DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The specification describes that if data is valid, RAM1 230 is initialized in step 310. In step 312, the program stored in the NAND-type flash memory 210 is copied into RAM1 230. See FIG. 3 and page 9, lines 12-16 of the specification. However, the specification does not describe an interface circuit for copying program data stored in the flash memory according to whether data stored in the flash memory contains errors, as recited in claim 1. The concepts of data being valid and data containing errors are not synonymous.

Allowable Subject Matter

3. Claims 11-13 and 15-20 allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: claim 14 is canceled and claim 11 is amended to incorporate the previously indicated allowable subject matter of claim 14.
